CARE ZONE™

ASTHMA

STOP RED ZONE

- Entering the Red Zone indicates that you need to be evaluated by a physician right away. You may need to be hospitalized, unless you can get these symptoms under control quickly. In an emergency, call 9-1-1.

- **Call your physician immediately.**

Physician: _____

Number: _____

- **Tender Nursing Care has a Nurse On-Call 24/7. Please call our office at 614-856-3508. We will review your signs and symptoms with you and are available to discuss treatment options with your physician.**

CAUTION YELLOW ZONE

- Your symptoms indicate that you may need an adjustment of your medications or treatment to get to the Green Zone. Fine tuning in this zone can help you stay out of the red zone and keep you healthy. Please, don't wait for your symptoms to go away or get worse. Call now.
- Eliminate triggers
- Stop strenuous exercise
- Add reliever medication: _____
- If no relief, continue with: _____
- **Tender Nursing Care has a Nurse On-Call 24/7. Please call our office at 614-856-3508, if you are unable to reach your home health nurse right away.**

Nurse: _____

Number: _____

Instructions: _____

GO GREEN ZONE!

Congratulations. Your symptoms are under control. You are where you feel your best and are managing your care and symptoms well. Tender Nursing Care is committed to helping you stay in your Green Zone. Continue to evaluate how you are feeling every day.

- Continue taking your medications as ordered
- Continue monitoring peak flow
- Keep all physician appointments

STOP

- Peak flow less than 50% of personal best
- Very short of breath
- Extreme difficulty breathing
- Usual activities severely limited
- Difficulty walking and talking due to shortness of breath
- Respiratory effort increased, skin between neck and ribs pulls in with breathing
- Skin color is pale or gray
- Fingernails or lips are blue

CAUTION

- Peak flow 50- to 80-percent of personal best
- Increased asthma symptoms (coughing, waking at night, wheezing, shortness of breath, tightness in chest, breathing faster, pale skin color)
- Call your physician if you are in the YELLOW zone most days. This is not where you should be.

GO!

- Your goal peak flow is _____
- Peak flows are 80- to 100 percent of your best number
- No symptoms
- Able to do usual activities
- Usual medications control asthma
